The current design of the data base is going to help you follow a rudimentary flow of the business for your restaurants. What we propose is that we expand the variety of data collected to help your business decision on every aspect of your business. We can tie in your inventory, menu, race, and age, integrate an app, etc. as your company grows the data will grow with it. All your slutty Vegan locations have a made record numbers in a very short amount of time and with the assistance of more information your company will be able to reach more customers beyond Atlanta to around the country.
